Parn Iranoppaiboon, a woman who loves to draw from creativity to make an illustration and graphic work. She focuses on communication through pictures to express different stories in various forms including still and motion pictures as well as letters. Her unique work style is to combine hand-drawn illustrations and alphabets, and further edit them by computer program.

Parn also works on art projects inspired by natural phenomenon and circle of life. Her art practices experiment various mediums and techniques. For example : to combine cyanotype art on clothes (blue print) with mirror reflection, to do projection mapping on paper crafts, to juxtapose x-ray film with popcorn in her installation project, as well as to explore natural reflection by using mirrors, aluminum sheets and stainless steel.
